Accompanying the 2001 exhibition that made its debut at a shop in Oxford Street, London, this title is in effect an inventory of the possessions that were broken down into their component parts during the installation.

The wildly popular YouTube star behind Clean My Space presents the breakthrough solution to cleaning better with less effort Melissa Maker is beloved by fans all over the world for her completely re-engineered approach to cleaning. As the dynamic new authority on home and living, Melissa knows that to invest any of our precious time in cleaning, we need to see big, long-lasting results. So, she developed her method to help us get the most out of our effort and keep our homes fresh and welcoming every day. In her long-awaited debut book, she shares her revolutionary 3-step solution: • Identify the most important areas (MIAs) in your home that need attention • Select the proper products, tools, and techniques (PTT) for the job • Implement these new cleaning routines so that they stick Clean My Space takes the chore out of cleaning with Melissa's incredible tips and cleaning hacks (the power of pretreating) her lightning fast 5-10 minute "express clean" routines for every room when time is tightest, and her techniques for cleaning even the most daunting places and spaces. And a big bonus: Melissa gives guidance on the best non-toxic, eco-conscious cleaning products and offers natural cleaning solution recipes you can make at home using essential oils to soothe and refresh. With Melissa's simple groundbreaking method you can truly live in a cleaner, more cheerful, and calming home all the time.

Using clear and accessible language this book examines the growing field of 'smart technology' for the home. The author first introduces the field before exploring the various background issues, including how the home differs from other environments. He then shows how these background issues affect the design and usability of these technologies. A detailed case study looks at the use of handheld and wearable digital technology in sheltered housing. The last section examines what it is like to live in a smart home and why they have so far failed to reach the levels of success originally predicted. Invaluable reading for anybody interested in designing smart technologies for the home.

Designed as a textbook for undergraduate students in various engineering disciplines—Mechanical, Civil, Industrial Engineering, Electronics Engineering and Computer Science—and for postgraduate students in Industrial Engineering and Water Resource Management, this comprehensive and well-organized book, now in its Second Edition, shows how complex economic decisions can be made from a number of given alternatives. It provides the managers not only a sound basis but also a clear-cut approach to making decisions. These decisions will ultimately result in minimizing costs and/or maximizing benefits. What is more, the book adequately illustrates the concepts with numerical problems and Indian cases. While retaining all the chapters of the previous edition, the book adds a number of topics to make it more comprehensive and more student friendly. What's New to This Edition • Discusses different types of costs such as average cost, recurring cost, and life cycle cost. • Deals with different types of cost estimating models, index numbers and capital allowance. • Covers the basics of nondeterministic decision making. • Describes the meaning of cash flows with probability distributions and decision making, and selection of alternatives using simulation. • Discusses the basic concepts of Accounting. This book, which is profusely illustrated with worked-out examples and a number of diagrams and tables, should prove extremely useful not only as a text but also as a reference for those offering courses in such areas as Project Management, Production Management, and Financial Management.

Discover the joy of cooking for yourself with more than 160 perfectly portioned, easy-to-execute recipes, flexible ingredient lists to accommodate your pantry, and ideas for improvising to your taste. Taking care to prepare a meal for yourself is a different experience than cooking for others. It can be a fun, casual, and (of course) delicious affair, but there are challenges, from avoiding a fridge full of half-used ingredients to ending up with leftovers that become boring after the third reheat. *Cooking for One* helps you make cooking for yourself special without becoming a chore with unussy yet utterly appealing meals that rely on ingredients you already have on hand, like Garam Masala Pork Chop with Couscous and Spinach and Weeknight Chicken Cacciatore. Don't have exactly the right ingredients? Never fear—with a "Kitchen Improv" box on every page, we offer ideas for altering the dish so it works for you. And for those weeks you didn't make it to the supermarket, we use a "Pantry Recipe" icon to clearly mark recipes that rely entirely on our checklist for a well-stocked pantry. We show you when it's worth making two servings (but never more) with our "Makes Leftovers" icon, and suggest how to transform those leftovers into a whole new meal. (We love our Spice-Rubbed Flank Steak with Celery Root and Lime Yogurt Sauce served over arugula as a hearty salad the next day.) Ingredients themselves often lead you to another exciting meal—when you're left with half an eggplant from Simple Ratatouille, we direct you to Broiled Eggplant with Honey-Lemon Vinaigrette as the perfect way to use it up. And if the thought of a sink full of dishes keeps you out of the kitchen, there are plenty of appealing one-pan dinners like Sheet Pan Sausages with Sweet Potatoes, Broccoli Rabe, and Mustard-Chive Butter or Couscous with Shrimp, Cilantro, and Garlic Chips that are here to save the day.

Current labor and material prices for home improvement projects. Take advantage of home improvement jobs you may never have bid on before by relying on the solid cost figures in this reference. That's why so many home improvement contractors use this manual as their company price book. You'll be able to quickly locate hard-to-find costs for demolition, foundations, framing, structural repairs, decking, deck repairs, window repair and replacement, door repair and replacement, wall and ceiling repairs, floor repair and replacement, kitchen and bathroom improvement prices, and much more.
