Behavioral phylogeny Fixed action pattern. • Sequence of behavioral acts that is unchangeable and usually carried to completion once initiated • Fixed action pattern is stimulated by a sign stimulus. • many animals only use a relatively small subset of sensory information to trigger behavior, humans are more complex.

~~Animal behavior—Washington State University~~

In this chapter, we discuss factors that determine when attitudes are good predictors of behavior, as well as additional factors that influence behavior. As persuaders we are often interested in influencing other people ' s behavior as well as their attitudes and beliefs.

~~Chapter 3 The Relationship Between Attitudes and behaviors~~

One of self-defeating behavior patterns is that I get upset easily. Some specific examples of this behavior is every time I try to make plans with my friends and they do not respond to me, I become depressed. The cause of this habit is being repeatedly let down, or repeatedly had my feelings hurt. Getting upset easily has effected my life a lot.
