Easter and Hybrid Lily Production (Timber Press Growers ...

Conventional production method of *Lilium longiflorum*, Easter lily, *L. x elegans*, Asiatic hybrid lily, and interspecific hybrids between these two species (LAIH) involves three distinct phases: bulb production, bulb programming, and greenhouse forcing. Bulb production phase lasts for 1 to 2 years after planting propagules obtained from tissue culture or scaling.

Easter And Hybrid Lily Production Principles And Practice

Therefore, they are scarce to come by during January, February and March. Although availability of Asiatic bulbs is now almost year-round, hybrid lilies are primarily marketed from February through May and particularly for Easter and Mother's Day. Asiatic lilies are a relatively short-term crop, 60-90 days vs. 80-130 days for Orientals depending on cultivar. Hybrid lilies are not difficult to grow as potted plants if a few basic cultural requirements are adhered to.

About 11.5 million Easter Lily bulbs were shipped to commercial greenhouses in the United States and Canada in 1996. The cultivar most widely grown today for greenhouse potted Easter Lily production is called "Nellie White." This selection was made by a lily grower

Easter And Hybrid Lily Production Principles And Practice

Pot-cooled bulbs are normally potted & held for three weeks at 63 ° F before the six weeks of bulb cooling (at 40-45 ° F) begins (see the 2020 Easter Lily schedule for details). The bulbs then require 14 weeks of greenhouse forcing. This entire process requires 23 weeks from initial potting to Easter.

2020 production schedule for Easter lilies now available ...

Callus cultures were established from immature leaf explants of Easter lily (*Lilium longiflorum* Thunb. cv. 'Nellie White'). These callus cultures were induced to undergo organogenesis within 3 weeks upon subculture to medium containing 0.1 mg l⁻¹ of both 2,4-dichlorophenoxyacetic acid and 6-benzylaminopurine. The regenerated plantlets were acclimatized under a mist and transferred to ...

Easter and Hybrid Lily Production: Principles and Practice ...

There are several different lily types suited to hydroponic production. The most well-recognized is the Easter lily (*Lilium longiflorum*), a white flower native to Japan and Taiwan that is traditionally grown for the Easter market trade. Different varieties of this lily are used as a greenhouse crop for the cut flower trade and as dwarf potted plants.

Easter Lily and Hybrid Lilies | Ornamental Production

By the turn of the century, Japan had taken over exporting Easter lilies and continued dominating the market until World War II began. Louis Houghton, an American World War I soldier, returned home...

Easter Lily Tradition and History - Guardian Liberty Voice

The longiflorum hybrids are produced primarily for the Easter holiday as a potted crop while the asiatics and orientals are marketed nearly year round as cut flowers and potted plants. In Florida, production of the asiatic and oriental hybrid lilies occurs generally from late fall through late spring.

Production of Hybrid Asiatic and Oriental Lilies

Easter lily differs depending on the method of cooling used. Easter lilies forced from naturally cooled bulbs generally have the highest leaf and flower number when compared to plants cooled using other cooling methods. Easter lilies produced from bulbs cooled using CTF generally have a lower flower and leaf number than naturally cooled bulbs.

Easter and hybrid lily production : principles and ...

(Asiatic hybrid lily) and Oriental lilies. The treatments were carried out 20 to 10 days before harvesting with different solutions in comparison with untreated controls. The application of sugars, antioxidants and mineral compounds significantly improved length and diameter of the stems and longevity and size of the flowers.

LEAF TREATMENTS TO IMPROVE CUT FLOWER QUALITY IN EASTER ...

A World War I soldier, Louis Houghton, is credited with starting U.S. Easter lily production when he brought a suitcase full of lily bulbs with him to the southern coast of Oregon in 1919. He gave them away to friends, and when the supply of bulbs from Japan was cut off as a result of the attack on Pearl Harbor, the rising price of the bulbs suddenly made the lily business a viable industry for these hobby growers, earning the bulbs the nickname "White Gold."

How to Grow and Care For Easter Lilies (Trumpet Lilies)

Current U. S. production began with a World War I soldier, Louis Houghton, who brought a suitcase full of hybrid lily bulbs to the South coast of Oregon in 1919. Houghton freely distributed bulbs to his horticultural friends and neighbors. With World War II, the Japanese source of bulbs was abruptly cut off.
