Plants in our World: Economic Botany: McGraw Hill

Economic Botany is a quarterly, peer-reviewed journal of the Society for Economic Botany that publishes original Research Articles, Notes on Economic Plants, Review Articles, and Book Reviews on a wide range of topics dealing with the utilization of plants by people. Economic Botany specializes in scientific articles that address the botany, history, evolution, and changing cultural/biological status of useful plants, their modes of use, and their cultural significance.

The Society for Economic Botany

Economic Botany is a quarterly journal published by The New York Botanical Garden for the Society for Economic Botany. Interdisciplinary in scope, Economic Botany bridges the gap between pure and applied botany by focusing on the uses of plants by people. The foremost publication of its kind in this field, Economic Botany documents the rich relationship between plants and people around the world, encompassing the past, present, and potential uses of plants. Each issue contains original ...

Economic Botany | Home

Plants in our World emphasizes how people use plants; including fundamental information on morphology, anatomy, and taxonomy as a foundation of general botany. Now in full color, the fourth edition includes molecular data that has immensely altered the understanding of relationships among flowering plants and recently pinpointed the origin of numerous crops.

About The Society for Economic Botany. The Society for Economic Botany (SEB) is about people exploring the uses of, and our relationship with plants, cultures and our environment—plants and human affairs. You might well call our research and educational efforts, the science of survival. We were established in 1959 and our mission is to foster and encourage scientific research, education, and related activities on the past, present, and future uses of plants, and the relationship between ...

The Society for Economic Botany

Economic botany is the study of the relationship between people and plants. Economic botany intersects many fields including established disciplines such as agronomy, anthropology, archaeology, chemistry, economics, ethnobotany, ethnology, forestry, genetic resources, geography, geology, horticulture, medicine, microbiology, nutrition, pharmacognosy, and pharmacology. This link between botany and anthropology explores the ways humans use plants for food, medicines, and commerce.
