Students may generally ignore sections in the assigned reading on discrete-time systems.

Signals and Systems | Unified Engineering I, II, III, & IV ...

Continuous-time signal: A signal which is continuous both in time and amplitude is called continuous-time signal. The continuous signal is a mathematical function of independent variable t , where the variable represents a set of real numbers. It is required that signals are uniquely defined in except for a finite number of points.. For example, consider the continuous-time unit step signal as ...
