American Flyer Trains

Unlike other fanciful toy trains of the day, Gilbert's 3/16th scale locomotives were scale models of the actual PRR K5 class 4-6-2 and the NYC J3 "Hudson." In 1946, keeping with this push towards realism, American Flyer trucks and mechanisms were changed to 0.884" gauge, and true S scale/gauge was born. 06 of 10.

True American Flyer aficionados claim this narrow focus is a conflict of interest and prevents the growth of S Gauge among new train operators. Most of the American Flyer-branded product sold by Lionel, LLC today is reissues of 1950s designs utilizing refurbished old Gilbert tooling, decorated in traditional road names and paint schemes used by Gilbert, as well as an influx of some of today's modern railroad heralds.

The gauge refers to the distance
between the two rails of the
track. In an S scale model, the

Download Free Gilbert American Flyer S Gauge

proportion is written as 1:64. This means that there is 3/16 of an inch for every foot of the actual train the toy was modeled after. The gauge for an S scale train is 0.884 inches between tracks.

American Flyer S Scale Model Railroads and Trains for sale ...

After the war ended, Gilbert went back to producing toys, introducing S scale model railroad trains running on S gauge 2 rail track in 1946, mostly in response to the shortcomings of O scale utilized by Lionel and Marx. These American Flyer trains were smaller and proportioned more realistically than either the pre-war American Flyer trains or its post-war competition.
