Welder ITI is a simple e-Book for ITI Engineering Course Welder, Sem- 1 & 2, Revised Syllabus in 2018, It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about gas welding plant and join MS sheet, different type of joints on MS, different types of joints- Fillet (T-joint, lap & Corner), Butt (Square & V), oxy-acetylene cutting plant and perform different cutting operations on MS plate, welding in different types of MS pipe joints by Gas welding (OAW), types of MS pipe joints – Butt, Elbow, T-joint, angle joint, flange joint, SMAW machine and perform welding in different types of MS pipe joints by SMAW, Dye penetration test, Magnetic particle test, Nick break test, Free band test, Fillet fracture test, Aluminium & MS pipe joint by GTAW, Plasma Arc cutting machine and cut ferrous & non-ferrous metals, resistance spot welding machine, brazing operation, Cast Iron machine parts Hard facing of alloy steel components and lots more.

best electrician theory book based on NSQF 5 pattern. This books covers week by week part syllabus and includes ample number of mcqs for practice. This is the most useful book for students of iti electrician courses and is upto the mark with the latest syllabus.

Plumber is a simple e-Book for ITI Engineering Course Plumber, Sem- 1 & 2, Revised Syllabus in 2018, It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about basic fitting the skills imparted are marking, sawing, chipping, filing, measurement, soldering, brazing, drilling, grinding, safety aspects covers components like OSH&E, PPE, Fire extinguisher, First Aid, gas welding, thread cutting on different types of pipes & fittings accessories, Brick wall cutting for concealing pipe line. Bending of Pipes, Making of pipe line circuit for water distribution, fixing Cocks & valve, Water analysis test, Water Pressure test, asbestos pipeline & maintenance of drainage pipe line, Electric pumps, Construction of inspection chamber, manhole, gutter, septic tank, socket, drainage pipe , Removal of leakage pipe line, Installation, fixing & maintenance of valve & cock, water meter, Fixtures, hot & cold water pipe line, Repairing & reconditioning of waste pipe line, Repairing & reconditioning, scraping & painting of sanitary fittings and lots more.

This volume gives a comprehensive and thorough review on recent advances in the science of welding and provides a treatise for their application in day-to-day welding activities. The essential science of welding is presented for the first time in a style that is comprehensible to the craftsman, engineer and scientist. The application of welding technology requires familiarity with a broad spectrum of engineering and science. The practitioners of this technology need to be familiar with mathematics, physics, chemistry, metallurgy, electrical engineering, and mechanical engineering to mention the basics. These practitioners may only have a scant knowledge in all areas, and this book is intended to provide those practising welding with a broad but subtly in-depth overview of the subject. To accomplish this the book is divided into: weld pool chemistry and microstructure, processes: high energy density; low energy density; and bonding, heat input and associated stress, and computer control. Each of these areas addresses the literature, the fundamental science and engineering, and where the technology stands with respect to the topic. The knowledge level anticipated is not that of a senior engineer or researcher, although they could enjoy the works as much as anyone, but is more designed for those involved in the daily practise of welding. Thus the book will be of interest to craftsmen, students, engineers, researchers, managers, and those interested in the Theory and Practice of welding.

Want to know what it takes to be a successful welding business owner or how to get your business to the next level? Then this book is your ultimate guide that is straight to the point about what you need to know and how to do it. It is your personal blueprint on how to start, establish and grow any metals related business. You will learn the following: How you can take a \$1000 or Less Investment and be self employed in about one week from today. How to start a shop or manufacturing plant without buying equipment. How and where to find high profit margin, Town, City, State and Federal contracting opportunities. How and where to find subcontracting opportunities from major corporations. □ Where to sell and how to get your products on store shelves and to dealership showrooms in just weeks. Low cost alternatives to hiring employees with no long term commitment. Detailed lists of business ideas and places to buy product manufacturing rights. Alternative business ideas that have little competition and will have customers searching for you. Exact ideas and suggestions on marketing a welding business that includes everything from business cards to websites and even strategies on buying welding businesses for sale. How to take advantage of other welding businesses and have them do the hard work for you. Just about everything else you need to know plus how to get free Government help. This book will reduce the learning curve on how to start, establish and grow any metal related business. It does not matter if you are opening a portable welding business, working from home, manufacturing products, opening a metal fabrication shop, or you are expanding to Government contracting opportunities. This book will give you what you need to know to succeed! The Welding Business Owner's Handbook is packed with tons of great information from the owner of www.GoWelding.Org. Quality real life hands-on information from a welder's point of view!
