Between the Jeppesen Private Pilot Manual and the FAR/AIM, a student has just about everything they would need to complete his or her Private Pilot Training. The illustrations in the book are probably the finest of the flight training manuals that I've seen. The book is expensive, but in my opinion, it's worth the cost.

Exam is required for earning the Private Pilot, Sport Pilot, and Recreational Pilot certificates. Using the FAA exam as the premise for learning, Gardner applies practical information so readers are not only prepared for the tests, but also for the cockpit. He augments the required aeronautical knowledge by giving specific tips and techniques, checklists, mnemonic devices, and sound advice from personal experience. A full-color foldout example of a sectional chart is provided inside the back cover for use with the numerous interactive exercises throughout the book. Each chapter concludes with sample FAA Knowledge Exam questions. A comprehensive glossary and index are included as well. This practical application of the FAA Knowledge Exam is not available in any other text! Included throughout the book are internet links for useful aviation websites, weather charts,

flight planning, etc., with a section showing examples of online weather sources and more. Also included is information on "FITS" (FAA/Industry Training Standards), scenario-based training, single-pilot resource management, and learner-centered grading. This is a convenient, comprehensive source for this information—everything complete in one book! With Gardner's approachable yet concise writing style, readers are able to quickly grasp the subjects, pass the required tests and checkrides, and gain an operational understanding of flight they can take straight to the cockpit. The Complete Private Pilot works as a companion textbook to ASA's Private Pilot Virtual Test Prep DVD Ground School. An integrated Flight/Ground Syllabus for both Part 141 and 61 programs is also available to accompany the textbook.

Foreword by Richard Taylor.

One of the most significant books on Aviation History that has been published to date. Aviation History is an exciting new full-color book that gives both new and experienced pilots a unique perspective on international aviation history. Each of the ten chapters is packed with information containing over 950 photographs and color graphics. Aviation History explores the question *what was aviation* from its birth in Annonay, France, in 1783, to the exhilarating accomplishments in space. Through personal profiles, you are able to meet the people who made significant contributions to aviation. You will explore historical evidence and see how historians use the artifacts of aviation to confirm what happened. 636 pages. ISBN# 0-88487-235-1
