JNC 8 Hypertension Guidelines - ACP

The JNC 8 guideline itself has been quite controversial. The most hotly debated recommendation is one to loosen the blood pressure goal for healthy patients from 140/90 mm Hg to 150/90 mm Hg starting at age 60.

Hypertension Diagnosis and Treatment Guideline

The guidelines were created after a committee of experts synthesized all available scientific evidence, and they were updated to provide guidance for doctors for the management of hypertension. JNC 8 recommends thresholds for treatment of high blood pressure, blood pressure goals, and evidence-based medication therapy.

JNC 8 Guidelines and Hypertension - Verywell Health

The panel members appointed to the Eighth Joint National Committee (JNC 8) used rigorous evidence-based methods, developing Evidence Statements and recommendations for blood pressure (BP) treatment based on a systematic review of the literature to meet user needs, especially the needs of the primary care clinician.
