Every great idea has a beginning. The same applies to Hollywood's movie industry. When the movies began more than 100 years ago, they were without sound, had subtitles and were accompanied by music. The "Classic Silent Films Poster Book" celebrates the silent era by presenting rare, vintage color posters from nearly 50 great silent movies of all time. Films represented in the book include "The Perils of Pauline" (1914), "The Birth of a Nation" (1915), "The Spoilers" (1914), "Intolerance" (1916), "Hell's Hinges" (1916), "Broken Blossoms" (1919), "Dr. Jekyll and Mr. Hyde" (1920), "Way Down East" (1920), "The Mark of Zorro" (1920), "Tol' able David" (1921), "Orphans of the Storm" (1921), "The Kid" (1921), "The Sheik" (1921), "The Four Horsemen of the Apocalypse" (1921), "Nanook of the North" (1922), "Safety Last" (1923), "The Hunchback of Notre Dame" (1923), "The Covered Wagon" (1923), "The Ten Commandments" (1923), "Greed" (1924), "The Iron Horse" (1924), "Sherlock, Jr." (1924), "Peter Pan" (1924), "The Big Parade" (1925), "The Gold Rush" (1925), "The Phantom of the Opera" (1925), "Ben Hur" (1925), "Son of the Sheik" (1926), "The Lost World" (1925), "Sparrows" (1926), "The Scarlett Letter" (1926), "The Black Pirate" (1926), "Don Juan" (1926), "Seventh Heaven" (1926), "What Price Glory? Film music often tells us how to feel, but it also guides us how to hear. Filmgoing is an intensely musical experience, one in which the soundtrack structures our interpretations and steers our emotions. *Hollywood Harmony* explores the inner workings of film music, bringing together tools from music theory, musicology, and music psychology in this first ever book-length analytical study of this culturally central repertoire. Harmony, and especially chromaticism, is emblematic of the "film music sound," and it is often used to evoke that most cinematic of feelings-wonder. To help parse this familiar but complex musical style, *Hollywood Harmony* offers a first-of-its kind introduction to neo-Riemannian theory, a recently developed and versatile method of understanding music as a dynamic and transformational process, rather than a series of inert notes on a page. application of neo-Riemannian theory to film music is perfect way in for curious newcomers, while also constituting significant scholarly contribution to the larger discipline of music theory. Author Frank Lehman draws from his extensive knowledge of cinematic history with case-studies that range from classics of Golden Age Hollywood to massive contemporary franchises to obscure cult-films. Special emphasis is placed on scores for major blockbusters such as Lord of the Rings, Star Wars, and Inception. With over a hundred meticulously transcribed music examples and more than two hundred individual movies discussed, Hollywood Harmony will fascinate any fan of film and music.

The Oxford Handbook of Cinematic Listening explores the place of cinema in the history of listening. It looks at the ways in which listening to film is situated in textual, spatial, and social practices, and also studies how cinematic modes of listening have extended into other media and everyday experiences. Chapters are structured around six themes. Part I ("Genealogies and Beginnings") considers film sound in light of pre-existing practices such as opera and shadow theatre, and also explores changes in listening taking place at critical junctures in the early history of cinema. Part II ("Locations and Relocations") focuses on specific venues and presentational practices from roadshow movies to contemporary live-score screenings. Part III ("Representations and Re-Presentations") zooms into the formal properties of specific films, analyzing representations of listening on screen as well as the role of sound as a representational surplus. Part IV ("The Listening Body")

focuses on the power of cinematic sound to engage the full body sensorium. Part V ("Listening Again") discusses a range of ways in which film sound is encountered and reinterpreted outside the cinema, whether through ancillary materials such as songs and soundtrack albums, or in experimental conditions and pedagogical contexts. Part VI ("Across Media") compares cinema with the listening protocols of TV series and music video, promenade theatre and personal stereos, video games and Virtual Reality.
