Endorsed by the American Association of Sleep Technologists (AAST) and widely used as the go-to text in the field, *Fundamentals of Sleep Technology, 3rd Edition*, provides comprehensive, up-to-date coverage of polysomnography and other technologies in the evaluation and management of sleep disorders in adults and children. This edition has been extensively updated and expanded to reflect current practice, the latest technology, and the broader roles and responsibilities of the sleep technologist. Content is enhanced with new illustrations, tables, and treatment algorithms. This textbook, written by and for sleep technologists, is the ideal resource for those practicing in the field of sleep medicine or preparing for licensing exams in sleep technology.

With over two decades of classroom experience, Michael Passer knows how to guide students through the ins and outs of research methods in ways they can actually understand and put into practice. In this remarkable text, Passer's experience leads to chapters filled with clear explanations, resonant examples, and contemporary research from across the breadth of modern psychology, all while anticipating common questions and misunderstandings.

When you are criticized or rejected, do you have a tendency to lash out or withdraw entirely? Both types of knee-jerk reactions can have lasting and unintended consequences, affecting our friendships, careers, families, and romantic relationships. The truth is, overreacting hurts us as much as it hurts the people around us. You may see overreacting as an unchangeable part of your personality, but in reality, this tendency, like any other, can be unlearned. *Stop Overreacting* helps you identify your emotional triggers, discover a new way of processing impulsive thoughts and feelings, and understand how your emotions can undermine your ability to think rationally in moments of crisis and stress. You'll learn how to neutralize overwhelming emotions and choose healthy responses instead of flying off the handle. Ready to make a change for the better? It's time to stop overreacting and start feeling collected and in control.

Climate change presents a large, complex and seemingly intractable set of problems that are unprecedented in their scope and severity. Given that climate governance is generated and experienced internationally, effective global governance is imperative; yet current modes of governance have failed to deliver. Hayley Stevenson and John Dryzek argue that effective collective action depends crucially on questions of democratic legitimacy. Spanning topics of multilateral diplomacy, networked governance, representation, accountability, protest and participation, this book charts the failures and successes of global climate governance to offer fresh proposals for a deliberative system which would enable meaningful communication, inclusion of all affected interests, accountability and effectiveness in dealing with climate change; one of the most vexing issues of our time.

This book is a fast-paced and thorough re-evaluation of what heritage tourism means to the people who experience it. It draws on contemporary thinking in human geography and heritage studies, and applies it to a sector of tourism that is both pervasive yet poorly researched in terms of the perspective of tourists themselves. In a series of lucid and tightly argued chapters, it traces the use of semiotics as an analytical tool from its theoretical origins in text, through the all-important dynamics of visibility into an expanded realm of feeling and sensuality. Challenging assumptions about the way that heritage is experienced, this book uses examples from around the world to explore the semiotic landscape that surrounds heritage sites, linking what is represented about the past and how it feels to be there.

The exploding global consumption of meat is implicated in momentous but greatly underappreciated problems, and industrial livestock production is the driving force behind soaring demand. Following his previous ground-breaking book *The Global Food Economy*, Tony Weis explains clearly why the growth and industrialization of livestock production is a central part of the accelerating biophysical contradictions of industrial capitalist agriculture. *The Ecological Hoofprint* provides a rigorous and eye-opening way of understanding what this system means for the health of the planet, how it contributes to worsening human inequality, and how it constitutes a profound but invisible aspect of the violence of everyday life.

A biography of one of nineteenth-century America's foremost poets and public intellectuals.

A lighthearted reference to "visiting" ancient Rome identifies the period's top accommodations, activities, and things to avoid, in a reference that profiles a sea journey to Italy, a tour of the famous seven hills of Rome, and the opulence of an imperial Palatine Hill palace.
