Psychological Types By Carl Jung  
Psychological Types ( German: Psychologische Typen) is a book by Carl Jung that was originally published in German by Rascher Verlag in 1921, and translated into English in 1971, becoming volume 6 of The Collected Works of C. G. Jung. In the book, Jung proposes four main functions of consciousness: two perceiving or non-rational functions ( Sensation and Intuition ), and two judging or rational functions ( Thinking and Feeling ).

Carl Gustav Jung is perhaps the most famous dissident of classic psychoanalysis. He strayed away from Freudian ideas and explored ancestral roots and the collective unconscious and had many revolutionary ideas. One of them was the 12 Jungian archetypes of personality. To define his 12 archetypes of personality, Jung studied the symbols and myths of many different cultures.

Psychological Types is one of Jung's most important and famous works. First published in English by Routledge in the early 1920s it appeared after Jung's so-called fallow period, during which he published little, and it is perhaps the first significant book to appear after his own confrontation with the unconscious. It is the book that introduced the world to the terms 'extravert' and 'introvert'. Though very much associated with the unconscious, in Psychological Types Jung shows himself to be a supreme theorist of the conscious. In putting forward his system of psychological types Jung provides a means for understanding ourselves and the world around us: our different patterns of behaviour, our relationships, marriage,

national and international conflict, organizational functioning. This Routledge Classics edition includes a new foreword by John Beebe.

Jung's model of typology is the basis for type tests widely used in business and university, including the Myers-Briggs Type Indicator (MBTI). This book explains in detail Jung's views on the psychological attitudes of introversion and extraversion, the functions of feeling, thinking, sensation and intuition, and the pesky role of the unconscious. Includes an essay by H.K. Fierz, "The Clinical Significance of Extraversion and Introversion".

into primary types of psychological function. He proposed four main functions of consciousness: Two perceiving functions: Sensation and Intuition Two judging functions: Thinking and Feeling The functions are modified by two main attitude types: extraversion and introversion. Jung theorized that the dominant function characterizes consciousness, while its opposite is repressed and characterizes unconscious behavior.

"For nearly a century, analytical psychologists have been using Jung's typology without knowing precisely how it came into being. Reading this correspondence one finds oneself eavesdropping on the process of formulation. It is as if one can hear Jung thinking aloud as he develops seminal concepts--extraversion and

It is a beautiful work of art, and it is a masterpiece of thought. In this beautifully edited publication, Beebe and Falzeder have made a valuable contribution to Jungian studies."--Anthony Stevens, author of "Jung: A Very Short Introduction" "This correspondence between Jung and Schmid-Guisan permits us a lively aperture into the birth and formation of a psychological theory which has enormous implications for understanding human conflict. Each man, seeking the truth of typology, argues from his own psychological bias, critiques the other, and still remains trapped within his subjective limits. These letters constitute a stunning look into the development of this major conceptual scheme in the history of psychology."--John Burnham, Ohio State University "This collection of letters is important precisely because they were preparatory to Jung's later work. The letters show his process of thinking and are informed, literate, and expressive. The book's editors know their subject well and their scholarship is sound."--Geoffrey Cocks, Albion College

Central volume from Jung's Collected Works will be essential to anyone requiring a proper understanding of Jung's psychology.

Jung and Intuition examines for the first time the twelve categories of intuition described in both the works of C. G. Jung and the post-Jungians. Nowhere, other than in Jung's own work, has intuition been more fully treated. Each form of intuition is critically explained in the historical context of its appearance and located in one of the four spheres of Jung's psychology: the unconscious, the subconscious (Unterbewusste), consciousness, and Jungian and post-Jungian practice. This work brings Jung's entire psychology in all its depth from 1896 to its contemporary use into greater clarity for both

professionals and lay readers. The author persuasively shows that intuition is at the heart of Jung's psychology. It is central to his concept of the archetypes as well as to his understanding of the subconscious and the active imagination. It also involves both clinical and philosophical approaches, as powerfully demonstrated by his pioneering work at the Burgholzli Klinik in Zurich.

The field of Jungian psychology has been growing steadily over the last twenty years and awareness is increasing of its relevance to the predicaments of modern life. Jung appeals not only to professionals who are looking for a more humane and creative way of working with their clients, but also to academics in an increasingly wide range of disciplines.
