The goal of this product is to empower students to apply scientific thinking to the psychology of their everyday lives. By applying scientific thinking--thinking that helps protect us against our tendencies to make mistakes--we can better evaluate claims about both laboratory research and daily life. Students will emerge with the critical-thinking skills and open-minded scepticism they need to distinguish psychological misinformation from psychological information. The product is designed to encourage students to keep an open mind to new claims, but to insist on and evaluate evidence informing these claims.

This book explores the psychological nature of forgiveness for both the subjective ego and what Jung called the objective psyche, or soul. Utilizing analytical, archetypal, and dialectical psychological approaches, the notion of forgiveness is traced from its archetypal and philosophical origins in Greek and Roman mythology through its birth and development in Judaic and Christian theology, to its modern functional character as self-help commodity, relationship remedy, and global necessity. Offering a deeper understanding of the concept of "true" forgiveness as a soul event, Sandoval reveals the transformative nature of forgiveness and the implications this notion has on the self and analytical psychology.
