Engineers and scientists of all types are often required to write reports, summaries, manuals, guides, and so forth. While these individuals certainly have had some sort of English or writing course, it is less likely that they have had any instruction in the special requirements of technical writing. Filling this void, Technical Writing: A Practical Guide for Engineers and Scientists enables readers to write, edit, and publish materials of a technical nature, including books, articles, reports, and electronic media. Written by a renowned engineer and widely published technical author, this guide complements the traditional writer's reference manuals and other books on technical writing. It helps readers understand the practical considerations in writing technical content. Drawing on his own work, the author presents many first-hand examples of writing, editing, and publishing technical materials. These examples illustrate how a publication originated as well as various challenges and solutions.

Check Your Practice boxes added throughout feature scenarios and discussion questions to promote active learning.

Organisations need to use their information and knowledge resources in an efficient and effective manner. Hence the goal of this manual – which is to help build the ICM strategy development skills of agriculture and rural development organisations in ACP countries. Based on a review of work already done in the area, CTA has developed two publications – this Facilitator's guide and a User's manual (see CTA no. 1727). The manuals stress the importance of teamwork, consultation and getting the buy-in of all stakeholders.

Although the 21st century library is competing with numerous web-based resources, its clients can benefit from using its research assistance, physical and online holdings, and physical space, so they need to understand what the library offers. Marketing the 21st Century Library systematically and concisely teaches students and practitioners how to and why they should market and promote academic libraries. Librarians need to use marketing not only to advertise and promote resources, but also to boost the profession and the role we play. The book introduces key marketing concepts, followed by the history of library marketing. Subsequent chapters guide readers through a series of tools and resources so they can create their own marketing plans, concluding with an exploration of resources, services and further readings. Includes web extras, tables, problem and solution exercises Contains extensive references to real-world examples of good practice Details practical examples and case summaries from leading libraries Explores the importance of marketing and promoting academic libraries Provides resources for readers to help create marketing plans

Written by teachers and successful entrepreneurs, this textbook includes guidance, instruction and practical lessons for the prospective entrepreneur.
