By Nick DeMartino. Each one of us generates vast amounts of data—email, phone calls, social networking, photos, text messages, videos, browsing, purchasing, and more. Our data create a new form of identity, what you might call a “Virtual Self”—a concept that will determine the future of the Web. This virtual identity, and all of the bits of data that comprise it, has become an incredibly valuable form of currency—it’s the way the value is exchanged online.

We believe that having a virtual self-representation dissimilar to the real self in a social situation might decrease anxiety, because (a) virtual embodiment through an avatar can significantly alter a person's body schema and social role (Biocca, 1997; Kilteni et al., 2012), and (b) a dissimilar virtual self provides anonymity, which reduces inhibition and anxiety and facilitates self-expression. Embodying a dissimilar self could thereby neutralize some of the factors that contribute to ...

"The host of CBC Radio's Spark explores the very real impact of the virtual information we generate about ourselves -- on our own lives, our communities, and our government. We generate enormous amounts of online data about our habits: where we go, what we do, and how we feel. Some of that is stuff we choose to report; some of it is the offhand data trails we leave behind. The Virtual Self looks at the debates and challenges around virtual data-

sharing -- from Facebook status updates to Google Navigator -- and its potential for building more responsive communities and governments. Nora argues that if we wrestle now with issues like privacy and data control, we can harness the power of that data. The host of CBC Radio's Spark, Nora Young has fascinating information at her disposal, unique insights into the intersection of the virtual and real worlds, and a wonderful voice for making all of these clear to a general audience. Accessible and entertaining, *The Virtual Self* takes that personal, psychological reality of everything from email to status updates and teases out the increasingly bigger impacts on the real world around us of the virtual information we all generate." -- Publisher's website.

The Virtual Self is an engaging and exciting text that addresses

It has been my experience and observation of students of Buddhism, that after an initial period of enthusiastic practice, they get stuck. They come to the edge of a gap, and can't go back but are stuck going forward. The edge of this gap represents the boundary that defines the results of their efforts so far. Serious effort has been

given to practice and to incorporating the fundamentals of the Buddha's method into their lives. Nevertheless, the practitioner I have in mind feels not only stuck but somewhat disheartened perhaps. Having exhausted the youthful enthusiasm that naturally arises upon discovery of the Buddha's path, one now feels a lack of joy. Looking beyond the boundary line of the gap, there seems to be a vast space between where one is now and the ultimate goal of enlightenment. *The Virtual Self: Beyond the Gap in Buddhist Philosophy* offers some suggestions for renewing one's inspiration and a way to joyfully navigate that sacred space beyond the gap.

Sometime in the present, corporate tyranny reigns supreme. To stop this madness, what can one person do? What can anybody do? Impassioned environmental activist and nightclub saxophonist Michael Quinn, and his techie guru sidekick, Simon, the mischievous circus clown, believe they, and the ubiquitous Wasteful Management team, have the answer for one day... several multinational corporation chief executive officers (CEOs), infamously renowned for their egregious actions, are mysteriously disappearing across the globe. They are "removed" from society in ways that illustrate poetic justice, as exemplified by the CEO of big agribusiness Tyrannex Inc. who is trampled by a giant GMO tomato in a remote part of India. Michael and Simon realize their window of opportunity is narrow, as Harry Potter and Bilbo's nemeses pale in comparison to real life's Multinational CEO sociopaths, whom

Michael and Simon must overcome to save the day and the planet! Jim Hightower says, "Wasteful Management is a refreshing combination of intrigue, humor, camp and serious politics, fusing the gravitas of a Noam Chomsky or a Bill Moyer with the edgy, stinging social commentary of a Jon Stewart or a Stephen Colbert, into a satirical mystery romp." Are you ready for the challenge? Bring your popcorn and come prepared to "boo, hiss" the villain and "cheer!" for the hero; sit back, and enjoy the ride!
