~~The World in the Model by Mary  
S. Morgan~~

During the last two centuries, the way economic science is done has changed radically: it has become a social science based on mathematical models in place of words. This book describes and analyses that change - both historically and philosophically - using a series of case studies to illuminate the nature and the implications of these changes.

~~How economists work and think~~

Nowadays, economists describe the world in pieces of mathematics and explain the phenomena of the real-world economy by reasoning with those little models. The World in the Model tells the story of this major cognitive shift in the way economic science is done, a shift involving imaginative and creative resources as well as a new mode of reasoning.

The World3 model is a system dynamics model for computer simulation of interactions between population, industrial growth, food production and limits in the ecosystems of the earth. It was originally produced and used by a Club of Rome study that produced the model and the book *The Limits to Growth* (1972).
