Transportation and Logistics Technology - Learn the skills ...

Transportation is the driver of logistics, but logistics is the race car driver in the seat of transportation. In fact, it's easy to see from that sentence alone, the pure difference. Logistics requires planning, transportation is just the mode to execute the planning, when getting freight from point A to point B. Clearly, they are not the same thing, but transportation is just simply a part of logistics.

What is Transportation and Logistics Management?

Transportation is a major contributor to the economy and a competitive force in business. It is the activity that physically connects the business to its supply chain partners, such as suppliers and customers, and is a major influence on the customer's satisfaction with the company. This chapter illustrates the role of transportation in the logistics function, the supply chain, and the larger economy.
