Zebras (subgenus Hippotigris) are African equines with distinctive black-and-white striped coats. There are three extant species: the Grévy's zebra (Equus grevyi), plains zebra (E. quagga) and the mountain zebra (E. zebra). Zebras share the genus Equus with horses and asses, the three groups being the only living members of the family Equidae. Zebra stripes come in different patterns, unique to each individual.

About the Zebra - Africa Guide

Zebras are equids – members of the horse family (Equidae) and are medium sized, odd-toed ungulates. Zebras are native to southern and central Africa. Although zebras are very adaptable animals as far as their habitats are concerned, most zebras live in grasslands and savannas. The Grevy's zebra (Equus grevyi) prefers to live in sub desert and arid grasslands.
