Torque converters from ZF feature optimum hydrodynamic efficiency. The lock-up clutch, a rigid connection between the impeller and the turbine rotor, ensures that the slippage of the hydrodynamic operation is eliminated and that engine power is transmitted to the drive train without any loss.

Torque Converters —ZF
This list of ZF transmissions details those automotive transmissions created by the German ZF Friedrichshafen AG engineering company.. There are two fundamental types of motor vehicle transmission: . Manual – the driver has to perform each gear change (i.e., the driver is required to shift gears); Automatic – once placed in drive (or any other 'automatic' selector position), it selects the ...
